DESCRIPTORS *College Programs: *Community Colleges: Cooperative Programs: Program Development: *Regional Programs: *State Programs: State Surveys: *Statewide Planning: Technical Education: Trade and Industrial Education: Two Year Colleges: *Vocational Education
IDENTIFIERS *Illinois

ABSTRACT

All approved occupational programs in Illinois public community colleges are listed in this inventory, as well as the occupational programs to be implemented in 1980, 1981, and 1982. A matrix identifies the colleges offering each of the occupational programs, which are listed according to Higher Education General Information Survey numbers. In addition to indicating the location of the program, the matrix also classifies the programs as: (1) district programs, which can be developed by any Illinois community college district if they are justified by employer demand, student interest, and available resources: (2) area programs, which are dependent upon the needs of a geographical area larger than a district: (3) regional programs, which serve a larger section of the State and are so specialized that no more than one would probably be approved for a region: (4) statewide programs, which are so specialized that only one or two would be approved in the State, but which would admit students from any district: and (5) cooperative programs, which are approved through contractual agreements with other institutions. If a program is proposed to be implemented in the next three years, the projected date is also indicated on the matrix. (AYC)

INTRODUCTION

"The Statewide Inventory of Current and Intended Occupational Programs at Illinois Public Community Colleges" is a publication listing all approved occupational programs in Illinois public community colleges and the proposed occupational programs projected to be implemented during the next three years.

This information was collected from Table 4.5 of the FY81 Resource Allocation and Management Plan (RAMP/CC) documents submitted by the individual districts in August 1979. The collection and compilation of the data for this inventory are two steps in the process of implementing Policy 6.16 for statewide and regional planning of instructional programs. The objective of the statewide and regional planning concept is to strenghten communication and cooperation in program planning among local institutions. The statewide and regional planning activities were also designed to be supportive of cooperative contractual agreements which exist between and among institutions. It is our hope that the process will continue to stimulate the community colleges to recognize and consider the intent of neighboring institutions to initiate cooperative planning throughout the State. The Illinois Community College Board staff has witnessed an increase of resolving programmatic conflicts at the local level, and information sharing through the regional planning meetings is a primary contributor to this process.

The Illinois community college system is informally divided in regional districts for planning of new programs. The Illinois Community College Board Office utilizes the Illinois Community College Trustees regional designations as the regions for such program planning as shown on page iv.

The proposed programs are those projected for implementation in 1980, 1981 and 1982 and do not constitute commitments on the part of the ICCB for occupational program approval

Joyce A. Lauder
Dennis W. Howland
James M. Howard
Fred L. Wellman

DEFINITIONS OF ABBREVIATIONS

The definitions listed below are those approved by the ICCB, May 21, 1976, to be utilized in the statewide and regional classification for occupational programs in Illinois public community colleges. These have been supplied to provide an explanation of the abbreviations utilized throughout this document. The capital letter preceding the definition is used in the charts as the approved classification for that program.

D = DISTRICT PROGRAM — A program which can be developed by each Illinois public community college district if justified by employer demand, student interest and available resources in the district.

A = AREA PROGRAM — A program dependent upon the needs of a geographical area larger than a single district. The number of area programs in a region is based upon a number of factors: population centers, natural resources, location, industrial facilities, manpower needs, etc. An area program must allow space for students from other sections of the State. When program access cannot be obtained in neighboring community colleges and a definite need can be demonstrated, consideration is given for the approval of an area program by the ICCB.

R = REGIONAL PROGRAM — A program serving a larger section of the State and so specialized that probably no more than one would be approved for a region. A regional program must provide space for students from any community college in the region, not just for the students in the district offering the program. Boundaries for the regions roughly coincide with boundaries of the Illinois Community College Trustees Association's nine planning regions. However, regional boundary lines are not used arbitrarily to exclude students, and a students acceptance into a regional program is usually based on conditions relating to access (e.g., commuting time). Similarly, cooperative efforts between community college districts are not limited by arbitrary regional designations but are usually determined to favor student access.

S = STATEWIDE PROGRAM — A program so specialized or unique that only one or two would be approved in the State. A program designated as a statewide program must allow space for students from all parts of the State, not just students in the district, region, or area offering the program.

C = COOPERATIVE PROGRAM — A program approved to be offered through contractual agreement(s) with other institution(s) and limited by the specific arrangements agreed to in the contract; i.e., student access, equipment and facility use, fees, etc.

HEGIS = Higher Education General Information Survey
